

WhatHasChanged.com

WhatHasChanged is a website that allows the user to look up their year that they graduated high school, and allows them to see all the major changes that have occurred in school curriculums since they graduated.

WhatHasChanged is a searching tool that will tell you everything that has changed in American public schools since your graduation. All you need to enter is the year and state you graduated from, and whether it is Math, Science, History, or Social Studies you will be able to see what has changed since you attended high school. This state of the art engine will find what new textbooks schools are using, or what new subjects of history are being taught to the future generations. Whether you want to see what your kids are learning, or you want to catch up with the times this is the perfect website for you.
